

K-LOVE is a wonderful radio station. It serves me as a resident of my local community. K-LOVE lets me know about community events. It also provides "positive and encouraging" messages that are more geared toward my age group. You really can't get many positive and encouraging messages from most radio stations, let alone ones that are enjoyable to listen to. Allowing K-LOVE to continue would provide my community, and others like mine, to have this need met. It would be much more difficult if K-LOVE had to have an actual station at each community. And aside from that, it is almost satellite radio. It goes across the country, so it is a higher quality station. So many people are encouraged by listening to K-LOVE. Why would you take away a good thing like that?
